## INTRODUCTION

Action TESA has always been frontrunner in foresighting the latent needs of modern interior infrastructure industry thus introducing innovative products to meet the aspirations. Inspired by Eco-Friendly ethos, complimented with astute R & D team and latest technology Action TESA has succeeded in introducing HDHMR (HIGH MOISTURE RESISTANT HDF) **substitute of plywood**.

Action TESA HDHMR is now the most preferred products in both home & office furniture segment. We have initiated the revolution with our HDHMR Boards and now, we invite you to be a part of this revolution and take the panel industry to next step towards the future.

HDHMR is indigenously and exclusively manufactured and supplied by Action TESA in India.

## HDHMR - High Density High Moisture Resistance.

Action TESA HDHMR is manufactured using hard wood hence it's density is greater than any other products available in the market. Uniform density gradient & compact core gives it the best routing characteristics. This is achieved by using special **German Technology** for MAT formation & **8 cylinders, 18 daylight press-the 1st in India**.

Action TESA HDHMR is not only tougher than any available plywood in market but is also highly moisture resistance as well, which makes it a popular choice in extreme moist climatic conditions or areas. These boards are **Borer & Termite Resistant** which makes it a wise choice over plywood. These boards have uniform density gradient & compact core, achieved by using special **German Technology for MAT formation**, thus imparting best routing characteristics.

Action TESA HDHMR Boards have revolutionized interior infrastructure industry by extending aforestated inherent properties at a very nominal cost, thus is replacing plywood rapidly across PAN India. Excellent performance of these boards has succeeded in overcoming the traditional myth regarding plywood pertaining to toughness & longevity amongst the masses.

**Key Application Areas:** • Cafeteria • Gyms • Desk & Lockers • Schools & Colleges • Hospital • Office & Residential Area • Kitchen Shutter • Furniture Where Risk Of Moisture Exists • Door Shutters • Packing Industry • Partitions • Outdoor Fixtures Like Election Cutouts Or Similar Application

**FOR PRODUCT SIZES AND THICKNESS,  
PLEASE REFER SIZE MATRIX**

**Panel Size: 8ft x 4ft**

Available in Plain and Prelam - All shades of shade card

**HIGHER  
DENSITY**

**TOUGHER  
THAN PLYWOOD**

**NOMINAL  
COST**

**IDEAL ROUTABLE  
SUBSTRATE**

**NO SPLINTERS/  
CHIPING**

**MULTIDIMENSIONAL  
BONDING TECHNOLOGY**

**ZERO BUBBLE  
FINISH**

**ENVIRONMENT  
FRIENDLY**

**Higher Screw Holding  
Strength in core**
